TASA

OMEGA

BUSINESS UNIT

ONE OF THE MOST SUSTAINABLE FISHERIES IN THE WORLD

ABOUT THE PERUVIAN ANCHOVY FISHERY

THE PREFERRED AND MOST TRUSTED SOURCE FOR HIGH QUALITY OMEGA-3 FISH OIL

Peru has been recognized as the country with the best fishing performance in South America and remains among the top nations globally.

The Environmental Performance Index (2024) report conducted by Yale and Columbia Universities attributes this success to the sustainable management of anchovies that have maintained the species' biomass healthy and ensured proper industry control.

THE WORLD'S LARGEST PRODUCER OF OMEGA-3

The world's largest fish meal & oil producer, processing 23% of the Peruvian anchovy fishing quota (5% of the global annual production).

OMEGA BUSINESS UNIT

Sustainably assured supply of the very best omega-3 rich crude fish oil sources (complete chain of custody & control, from sea harvest to customer application).

TASA is the first 100% vertically integrated refined & concentrated omega-3 fish oil manufacturer in Peru.

◆ OFFERING GREAT VALUE

WITH A WIDE RANGE OF PRODUCTS TO ADDRESS INDIVIDUAL CUSTOMERS NEEDS AT ALL STAGES OF LIFE.

- 100% molecularly distilled
- Oxidative & Purity values well below industry limits

Our product range includes top quality fully refined omega-3 fish oils and several popular EE & TG concentrates:

- 1812TG
- Omega 30% TG
- 30/20EE
- 32/22EE
- 33/22TG
- 30/20EE
- 33/27EE

◆ OMEGA BUSINESS UNIT MANUFACTURING PLANT AND R&D FACILITIES DEVELOPMENT

In 2015, TASA's Omega Business Unit started production of high quality, fully refined TG oils, and concentrated omega-3 EE & TG fish oils.

Manufacturing plant:

- State of the art technology for a semi automated production process.
- Ensuring top quality GMP according to US (FDA), Europe (DG Sante) and China (CFDA) regulations, and product safety standards.

◆ TAKING CARE OF THE ENVIRONMENT AND THE COMMUNITY

TASA's Omega Business Unit operates with the utmost respect for the environment and sustainable business practices, in order to build a socially responsible enterprise.

A Green plant:

- Effluents are processed through our wastewater treatment facility.
- Treated water is recycled to irrigate the surrounding green areas.
- We use natural gas in our plant to reduce our emissions and ensure a cleaner and more efficient operation.
- In alignment with our Waste Management policy, we have enhanced our recovery efforts, achieving a 90% waste recovery rate.

Local community development

- We collaborate closely with the community on various high-impact social projects that emphasize environmental education and nutrition.
